The Evolution of Bio-Stimulation

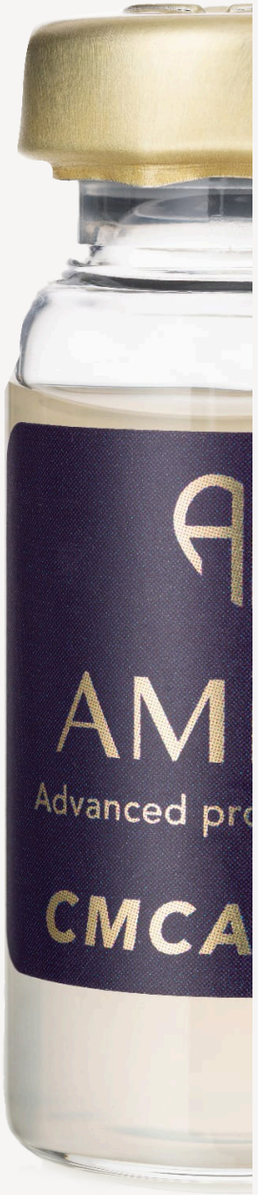

AMiKO

Advanced professional line

AMiKO CMCA Peel

The World's First Colostrum-Powered Professional Peel

The AMiKO CMCA Peel is a multi-active, professional-grade exfoliator that utilizes **Colostrum—the "Elixir of Life"**—to provide deep cellular nutrition during the peeling process.

WHY COLOSTRUM?

Colostrum is a nutrient-dense substance that accelerates skin healing and regeneration by stimulating collagen production. It strengthens the skin barrier, improves elasticity, and provides a rejuvenating, soothing effect that restores skin vitality.

THE COMPLEX:

- A synergistic blend of MCA (Monochloroacetic Acid),
- Salicylic Acid,
- Lactic Acid,
- Azelaic Acid.

KEY ACTION:

Targets the deeper layers of the dermis to stimulate tissue regeneration, regulate sebum, and diminish hyperpigmentation without the typical downtime of traditional deep peels.

PROFESSIONAL INDICATIONS:

- Severe photo-aging and fine lines.
- Post-acne scarring and enlarged pores.
- Melasma and post-inflammatory hyperpigmentation.

CLINIC ADVANTAGE:

Safe for all Fitzpatrick skin types.
Can be used as a standalone treatment or as a primer for advanced mesotherapy.

Note: A patch test is required 4–6 days prior to the AMiKO CMCA Peel treatment to ensure patient safety

AMiKO ROSE

Advanced Cellular Stimulator & Skin Booster

AMiKO Rose is a high-performance cocktail designed for advanced revitalisation and bio-remodeling. It is the ultimate solution for "loss of firmness" and skin that has lost its vitality.

THE FORMULATION

- High-molecular-weight Hyaluronic Acid,
- Succinic Acid,
- Trehalose,
- Centella Asiatica,
- complex of B-Vitamins (B3, B5, B6).

KEY ACTION:

Succinic acid works as a potent antioxidant and anti-inflammatory agent, while Trehalose protects skin structures from oxidative stress.

TREATMENT AREAS:

- **Periorbital:** Targets dark circles and "tired eyes."
- **Face, Neck, & Decollete:** Restores gentry and density.
- **Intimate Areas & Scars:** Promotes wound healing and tissue repair.

CLINIC ADVANTAGE:

Perfect for microneedling or mesotherapy protocols.

WHY CHOOSE THE AMIKO SYSTEM?

By integrating the CMCA Peel, Rose stimulator, and Tulip booster into your clinic's repertoire, you offer a complete synergistic anti-aging therapy that addresses every layer of skin health.

AMiKO TULIP

The Revolutionary Bioactive Lip Booster (Not a Filler)

AMiKO Tulip is the first-ever lip treatment designed to enhance volume and health by influencing **adipocyte (fat cell) volume** and vascular health, rather than just "filling" the tissue.

NATURAL VOLUME:

Utilizing Blackberry Fruit Extract and advanced peptides, it triggers a pro-adipogenic effect—stimulating the volume of fat cells within the lips for a natural, "non-fake" plumpness.

KEY ACTION:

- **Escin:** Supports microcirculation for a natural, healthy lip color.
- **Gallic Acid:** Stimulates collagen to smooth fine "smoker's lines."
- **Volume:** Enhances natural lip shape and plumpness through bioactive stimulation.

INDICATIONS:

Perfect for clients wanting subtle enhancement, deep hydration, or as a maintenance treatment to extend the life of traditional fillers.

RECOVERY & PROTECTION:

Vitamins B6, B12, and Panthenol soothe irritation and accelerate healing, making it perfect for post-treatment recovery or as a standalone daily luxury.
